Mark the letter A, B, C, or D on your answer sheet to indicate the sentence that is closest in meaning to each of the following questions.

Question 26: I'm sure Luisa was very disappointed when she failed the exam.

A. Luisa must be very disappointed when she failed the exam.

## B. Luisa must have been very disappointed when she failed the exam.

C. Luisa may be very disappointed when she failed the exam.

### D. Luisa could have been very disappointed when she failed the exam.

- Cấu trúc suy đoán 1 điều xảy ra ở quá khứ

# + S + may/might/must + have + V3/ed

: Có thể là đã, chắc hẳn là đã

Question 27: "You had better see a doctor if the sore throat does not clear up." she said to me.

A. She reminded me of seeing a doctor if the sore throat did not clear up.

B. She ordered me to see a doctor if the sore throat did not clear up.

C. She insisted that I see a doctor unless the sore throat did not clear up.

D. She suggested that I see a doctor if the sore throat did not clear up.

- Cấu trúc: S + suggest/recommend/urge/... + S + V(bare inf)

: 1. (thời tiết) trở nên trong xanh/ 2. (bệnh) biến mất)/ 3. (Vấn đề) giải quyết - clear up (v.) - sore throat (n.) : viêm hong

**Question 28:** Without her teacher's advice, she would never have written such a good essay.

A. Her teacher advised him and she didn't write a good essay.

B. Her teacher didn't advise her and she didn't write a good essay.

C. She wrote a good essay as her teacher gave her some advice.

D. If her teacher didn't advise her, she wouldn't write such a good essay.

- Cấu trúc: Because/As/Since + S + V: Bởi vì

Mark the letter A, B, C, or D on your answer sheet to indicate the sentence that best combines each pair of sentences in the following questions.

Question 29: She tried very hard to pass the driving test. She could hardly pass it.

A. Although she didn't try hard to pass the driving test, she could pass it.

B. Despite being able to pass the driving test, she didn't pass it.

C. No matter how hard she tried, she could hardly pass the driving test. (=Although she tried hard)

D. She tried very hard, so she passed the driving test satisfactorily.

- Cấu trúc: No matter how/However + adj/adv + S + V = Although + S + V + adj/adv : Mặc dù

**Question 30:** We didn't want to spend a lot of money. We stayed in a cheap hotel.

# A. Rather than spending a lot of money, we stayed in a cheap hotel.

B. In spite of spending a lot of money, we stayed in a cheap hotel.

C. We stayed in a cheap hotel, but we had to spend a lot of money.

D. We didn't stay in a cheap hotel as we had a lot of money to spend.

- Rather than doing sth : instead of doing sth

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct word or phrase that best fits each of the numbered blanks from 31 to 35.

# WAYS TO IMPROVE YOUR MEMORY

A good memory is often seen as something that comes naturally, and a bad memory as something that cannot be changed, but actually **(31)** \_\_\_\_\_ is a lot that you can do to improve your memory.

We all remember the things we are interested in and forget the ones that bore us. This no doubt explains the reason (32) \_\_\_\_\_ schoolboys remember football results effortlessly but struggle with dates from their history lessons! Take an active interest in what you want to remember, and focus on it (33) \_\_\_\_\_. One way to 'make' yourself more interested is to ask questions — the more the better!

Physical exercise is also important for your memory, because it increases your heart (34) \_\_\_\_\_ and sends more oxygen to your brain, and that makes your memory work better. Exercise also reduces stress, which is very bad for the memory.

The old saying that "eating fish makes you brainy" may be true after all. Scientists have discovered that the fats (35) \_\_\_\_\_\_ in fish like tuna, sardines and salmon — as well as in olive oil — help to improve the memory. Vitamin-rich fruits such as oranges, strawberries and red grapes are all good 'brain food', too.

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions from 36 to 42.

It used to be that people would drink coffee or tea in the morning to pick them up and get them going for the day. Then cola drinks hit the market. With lots of caffeine and sugar, these beverages soon became the pick-me-up of choice for many adults and teenagers. Now drink companies are putting out so-called "energy drinks." These beverages have the specific aim of giving tired consumers more energy [=Q36].

One example of a popular energy drink is Red Bull. The company that puts out this beverage has stated in interviews that Red Bull is not a thirst quencher. Nor is <u>it [=Q37]</u> meant to be a fluid replacement drink for athletes. Instead, the beverage is meant to revitalize a tired consumer's body and mind. In order to do this, the makers of Red Bull, and other energy drinks, typically add vitamins and certain chemicals to their beverages. The added chemicals are like chemicals that the body naturally produces for energy. The vitamins, chemicals, caffeine, and sugar found in these beverages all seem like a sure bet to give a person energy.

Health professionals are not so sure, though. For one thing, there is not enough evidence to show that all of the vitamins added to energy drinks actually raise a person's energy level. <u>Another problem is that there are so many things</u> in the beverages. Nobody knows for sure how all of the ingredients in energy drinks work together [=Q38].

Dr. Brent Bauer, one of the directors at the Mayo Clinic in the US, cautions people about believing all the claims energy drinks make. He says, "It is **plausible [=Q39]** if you put all these things together, you will get a good result." However, Dr. Bauer adds the mix of ingredients could also have a negative impact on the body. "We just don't know at this point," he says [=Q40], [=Q41].

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions from 43 to 50.

What is 'extreme' weather? Why are people talking about it these days? 'Extreme' weather is an unusual weather event such as rainfall, a drought or a heat wave in the wrong place or at the wrong time. In theory, they are very rare. But these days, our TV screens are constantly showing such extreme weather events [=Q43]. Take just three news stories from 2010: 28 centimetres of rain fell on Rio de Janeiro in 24 hours, Nashville, USA, had 33 centimetres of rain in two days and there was record rainfall in Pakistan.

The effects of this kind of rainfall are dramatic and **lethal [=Q44]**. In Rio de Janeiro, landslides followed, burying hundreds of people. In Pakistan, the floods affected 20 million people. Meanwhile, other parts of the world suffer devastating droughts [=Q46]. Australia, Russia and East Africa have been hit in the last ten years. And then there are unexpected heat waves, such as in 2003 in Europe. That summer, 35,000 deaths were said to be heat-related [=Q45].

So, what is happening to our weather? Are these extreme events part of a natural cycle? Or are they caused by human activity and its effects on the Earth's climate? Peter Miller says it's probably a mixture of both of these things. On the one hand, the most important influences on weather events are natural cycles in the climate. Two of the most famous weather cycles, El Niño and La Niña, originate in the Pacific Ocean. The heat from the warm ocean rises high into the atmosphere and affects weather all around the world. On the other hand, the temperature of the Earth's oceans is slowly but steadily going up. And this is a result of human activity [=Q50]. We are producing greenhouse gases **that [=Q47]** trap heat in the Earth's atmosphere. This heat warms up the atmosphere, land and oceans. Warmer oceans produce more water vapour - think of heating a pan of water in your kitchen. Turn up the heat, it produces steam more quickly. <u>Satellite data tells us that the water vapour in the atmosphere has gone up by four percent in 25 years [=Q49]. This warm, wet air turns into the rain, storms, hurricanes and typhoons that we are increasingly experiencing [=Q48]. Climate scientist, Michael Oppenheimer, says that we need to face the reality of climate change. And we also need to act now to save lives and money in the future.</u>

- landslide (n.)	: sạt lở đất		

Question 43: It is stated in the passage that extreme weather is \_\_\_\_\_

A. becoming more common		B. not a natural occurrence			
C. difficult for scientists to understand		D. killing more people than ever before			
Question 44: The word "letha	I" in the second paragraph	probably means			
A. far-reaching	B. long-lasting	C. happening soon	D. causing deaths		
Question 45: What caused the	ousands of deaths in 2003?				
A. a period of hot weather	B. floods after a bad sum	imer			
C. a long spell of heavy rain	D. large-scale landslides				
Question 46: According to the	e passage, extreme weathe	r is a problem because	·		
A. we can never predict it	B. it only affects crowded	d places			
C. it's often very destructive	D. its causes are complet	tely unknown			
Question 47: The word "that"	in the third paragraph refe	ers to			
A. Earth's oceans	B. human activity	C. greenhouse gases	D. Earth's atmosphere		
<b>Question 48:</b> Extreme weather can be caused by					
A. satellites above the Earth		B. water vapour in the atmosphere			
C. very hot summers		D. water pans in your kitchen			

TRÉ TREU

Page 7

Question 49: Satellites are used to \_

A. change the direction of severe storms

B. trap greenhouse gases in the atmosphere

# C. measure changes in atmospheric water vapour

D. prevent climate from changing quickly

Question 50: Which statement is NOT supported by the information in the passage?

A. Extreme weather is substantially influenced by human activity.

B. Unusual weather events are part of natural cycles.

C. We can limit the bad effects of extreme weather.

D. Such extreme weather is hardly the consequence of human activity.
